

LotFlux Pro Release Notes

v0.3.0 — 2026-04-02

Bug Fixes — Lead Forms, Schema Markup, Instruction Partial

src/Leads/WalkthroughForm.php — Made \$variant parameter optional

(default ""); prevents fatal error
when free plugin passes only 1 arg;
aligned field config structure with
template (placeholder, type, label)

src/Leads/TradeinForm.php — Same \$variant default fix; aligned

field config structure with template

src/Features/SchemaMarkup.php — Fixed JSON-LD rendering as visible

text; moved from injecting <script>
into card/detail HTML (stripped by
wpkses_post) to collecting schemas
and outputting in wp_footer

src/Admin/Partials/Instructions/featured-params.php

— Added missing description and
wrapper_id keys; renamed desc to
description; restructured examples
to heading/shortcode/explanation
format expected by InstructionsRenderer

src/Admin/Partials/Instructions/options-params.php

— Same fixes as featured-params.php

src/Admin/Partials/Instructions/inventory-pro-params.php

— Renamed desc to description

LotFlux Pro Release Notes

src/Admin/Partials/Instructions/vehicle-pro-params.php

— Renamed desc to description

src/Admin/Partials/Instructions/lead-pro-params.php

— Renamed desc to description

v0.2.0 — 2026-03-31

Phase 2 — All Feature Modules

Feature Classes (23):

PremiumFilters, PremiumAppearance, ThemeOverrides, CrmWebhook, SyncUpgrade, SimilarVehicles, DarkTheme, SchemaMarkup, SocialOpenGraph, PriceDisplay, PrintSpecSheet, QrCodeGenerator, VehicleComparison, SavedFavorites, FeaturedWidget, DashboardWidget, LeadSourceTracking, WhiteLabel, MultiLocation, InventoryAlerts, FontSizeControls, DetailButtonControls, CardFieldSelection

Utilities (2):

QrEncoder (pure PHP QR SVG), TokenInterpolator ({{field}} token resolution)

Analytics System (4):

AnalyticsDB (full CRUD), AnalyticsTracker, AnalyticsAjax, AnalyticsTab

Lead Forms (2): WalkthroughForm, TradeinForm

Shortcodes (1): OptionsShortcode ([lotflux_options])

Admin (2): ProInstructions, PerformancePanels (Cache TTL)

LotFlux Pro Release Notes

Instruction Partial (5): featured, options, inventory-pro, vehicle-pro, lead-pro

Templates (3): featured-carousel, featured-grid, featured-compact

Vendor (1): SortableJS 1.15.6

Assets:

Frontend CSS — dark theme, carousel, compact, similar vehicles, compare modal, favorites drawer, print styles, QR, price display (call for price, MSRP, price drop badge)

Frontend JS — UTM capture, carousel auto-advance, compare cookie/modal, favorites cookie/drawer, analytics lead_click tracking

Admin CSS — analytics tab, dashboard widget, alerts, fonts tab, QR column

Admin JS — analytics Canvas chart, SortableJS init, alerts CRUD

Bootstrap — all init() calls activated, frontend asset conditional loading

=====

v0.1.0 — 2026-03-28

Phase 1 — Foundation

Scaffold:

lotflux-pro/ — Full directory structure: src/, assets/, templates/, languages/

lotflux-pro.php — PSR-4 autoloader (LotFluxPro\

LotFlux Pro Release Notes

namespace); dependency check
(LOTFLUX_VERSION); version check
(LOTFLUX_PRO_MIN_FREE_VERSION);
load_plugin_textdomain; feature
init gated by license level at
plugins_loaded priority 20

Constants (6 files):

src/Constants/LicenseLevel.php — PREFERRED=1, PREMIUM=2, FREE=3;

LMFWC API_URL; UPDATE_URL for
static JSON manifest; product ID
placeholders; fromProductId()
tier mapper; label() helper

src/Constants/LevelPrefix.php — level_, enable_, level_search_

prefixes for OptionLevels maps

src/Constants/ProSettings.php — All LFP_* wp_options keys: license,

appearance, CRM, sync, analytics,
schema, price display, QR, OG,
favorites, alerts, fonts, detail
buttons, CTA, card fields; option
group constants

src/Constants/ProMetaKeys.php — _lfp_* CPT meta keys: call_for_price,

msrp, previous_price, price_dropped,
price_drop_date

src/Constants/ProShortcodes.php — Shortcode names (featured, options,

favorites); param key constants for

LotFlux Pro Release Notes

all Pro shortcodes and Pro additions

to free shortcodes

src/Constants/AnalyticsEvents.php — Event types (impression, detail_view,

lead_submit, lead_click); traffic

source constants; types()/sources()

helpers

License System (LMFWC v3.0.15):

src/License/LicenseManager.php — Static methods: init(), getLevel(),

getKey(), getEmail(), isActive(),

isDevMode(); AJAX activate/deactivate

via LMFWC REST API (PUT licenses/

activate/{key}, PUT licenses/

deactivate/{key}); HTTP Basic auth

with consumer key/secret from

wp-config.php; periodic validation

on admin_init (24h transient);

LF_DEV_LICENSE override bypasses

all server calls

src/License/LicenseGate.php — isAllowed(), wrap(),

getUpgradeNotice(),

getRequiredLevel(); loads merged

OptionLevels map from

GeneralOptionLevels.php +

FieldOptionLevels.php; static

cache with reset()

LotFlux Pro Release Notes

Updater:

src/Updater/PluginUpdater.php — Self-hosted updates via static JSON manifest at lotflux.com/updates/
lotflux-pro.json; hooks
pre_set_site_transient_update_plugins
and plugins_api; 12h transient cache;
appends license key to download URL;
"valid license required" message when
package URL empty

Admin Integration:

src/Admin/ProAdminPage.php — Filters `lotflux_admin_tabs`: removes
free Upgrade tab, adds License tab;
hooks `lotflux_render_tab_license`;
registers `LicenseSettings` on
`admin_init`

src/Admin/LicenseSettings.php — License key input, activate/deactivate
buttons (AJAX), status badge, tier
badge, version display; Force License
Level dropdown when `LF_DEV_LICENSE`
defined (Free/Premium/Preferred);
`registerSettings()` for dev override

src/Admin/OptionLevels/GeneralOptionLevels.php — Setting→tier map for general
settings (CRM, sync, appearance,
schema, price, QR, favorites, fonts,

LotFlux Pro Release Notes

detail buttons, CTA, card fields,
white label, locations, alerts,
analytics)

src/Admin/OptionLevels/FieldOptionLevels.php — Setting→tier map for filter fields
(model, mileage, length, sleeps,
slide_outs, fuel_type, color at
Premium; dealer_id at Preferred)

Analytics (stub):

src/Analytics/AnalyticsDB.php — Custom table {prefix}lotflux_analytics
with schema versioning; createTable()
via dbDelta for activation hook;
needsUpgrade() check; full CRUD
deferred to Phase 5

Uninstall:

uninstall.php — Drops analytics table; deletes all
LFP_% options; clears transients;
removes cron schedules; runs only
on plugin deletion

Assets:

assets/admin/lotflux-pro-admin.css — License status/tier badges, gated
field overlay, upgrade badge, AJAX
loading spinner (lfp- prefix)
assets/admin/lotflux-pro-admin.js — License activate/deactivate AJAX

LotFlux Pro Release Notes

handlers; status/tier badge updates;

page reload on success

assets/frontend/lotflux-pro-frontend.css — Stub (Phase 3+)

assets/frontend/lotflux-pro-frontend.js — Stub (Phase 3+)

readme.txt — External services disclosure for

LMFWC license server
